## 01.00-K Point System For Violations of Commission Regulations

- A. The Commission has determined that certain violations of its regulations, or a series of violations, are so harmful to the fish and wildlife resources of the State that they warrant a suspension of an individual's hunting and fishing rights, privileges and related licenses. The Commission regards such action as a valid means of protecting the fish and wildlife resources of the State. Under subsection B of this Code, points are assigned for the various offenses. When a person cited for such an offense pleads guilty or no contest, forfeits an appearance bond, or otherwise is convicted by a court of competent jurisdiction, the Commission assesses the points on that person's hunting and fishing violation record. The accumulation of a certain number of points within the time specified can result in administrative suspension of hunting and fishing rights, privileges and related licenses for a specific period of time.
- B. The Commission shall assign violation points to:
1. A person convicted of violating a Commission regulation;
  2. A person convicted of violating a federal wildlife law or regulation in Arkansas; and
  3. In accordance with Code [01.00-Q](#), an Arkansas resident convicted of a wildlife offense in another state that is a member of the Interstate Wildlife Violator Compact.

Violation point values for Commission regulations are as follows:

- Class 1 Offense = 6 Points
- Class 2 Offense = 12 Points
- Class 3 Offense = 18 Points
- Class 4 Offense = 30 Points
- Class 5 Offense = 99 Points
- Unclassified Offense = 0 points

The violation point value for a federal wildlife law or regulation violation shall be equal to the violation point value for the most similar Commission regulation violation. If a court imposes an enhanced penalty pursuant to Code [01.00-J](#), the Commission shall assign corresponding violation points for the higher class of offense.

- A. For administration of this Point System, the Commission shall assign violation points as of the date of a person's conviction for an offense, and such convictions and violation points will remain on a person's AGFC violation record indefinitely. For the purpose of determining a person's eligibility for suspension or revocation under Code [01.00-L](#), violation points associated with an offense for which a conviction resulted will expire 5 years after the date of conviction for that offense. The Commission shall not consider violation points that have:
1. Previously been counted and formed the basis for issuance of a suspension or revocation, or
  2. Expired.

## **01.00-L Denial, Suspension, Or Revocation Of Licenses, Permits, Tags, And Stamps**

- A. The Director of the Arkansas Game and Fish Commission, or his or her designated representative, is authorized to suspend or revoke the hunting and fishing rights and privileges and any Commission-issued license, permit, tag, or stamp of any person and to deny the application of any applicant in accordance with due process, upon reasonable cause or a showing through the Commission's records or other sufficient evidence that the person has met 1 or more of the following criteria:
1. Accumulated 18 or more violation points within the past 5 years for violations of Commission regulations;
  2. Made a material misrepresentation or practiced fraud or deceit in an attempt to obtain or use a license, permit, tag, or stamp;

Under either federal law or another state's law, has received a lifetime revocation of his or her hunting or fishing rights or privileges or any related licenses, or been convicted within the past 5 years of a hunting or fishing violation, which, if the conviction had been pursuant to Arkansas law, would have been grounds for suspension or revocation;
  5. Failed to comply with any term of a license, permit, tag or stamp;
  6. Failed to comply with any term of a citation for a hunting or fishing violation (including, without limitation, failure to appear in court or to otherwise resolve the case such as by paying a fine); or
  7. Has received a suspension or revocation of his or her hunting or fishing rights, privileges, or any related licenses by another state that is a member of the Interstate Wildlife Violator Compact Act (Code [01.00-Q](#)).
- B. The Director of the Arkansas Game and Fish Commission, or his or her designated representative, shall suspend the hunting and fishing rights, privileges, and any related licenses of any person who has accumulated a violation point count of 18 or more within a 5-year period. The length of the suspension shall be based on the point accumulation total as follows:
1. 18 to 24 Points = 1 year suspension
  2. 25 to 48 Points = 2 years suspension
  3. 49 to 72 Points = 3 years suspension
  4. 73 to 98 Points = 5 years suspension
  5. 99 Points or more = 7 years suspension

Any person who receives a hunting suspension shall be ineligible to apply for any Commission permit hunts during the period of suspension; however, an owner of a private inholding (Code [02.02](#)) having a hunting suspension shall be eligible to apply for WMA

## **01.00-P No Liability For Wildlife Damages**

Pursuant to Amendment 35 of the Arkansas Constitution, the Arkansas Game and Fish Commission is responsible for the control, management, restoration, conservation, and regulation of the birds, fish, game, and wildlife resources of the State as trustee for the use and common benefit of the people. The Commission fulfills its responsibilities through legal application and administration of the State's wildlife laws and regulations. However, in doing so, it generally is not within the Commission's ability to control the habits or actions of all of the individual wild animals throughout Arkansas so as to prevent them from causing incidental injury or damage. Therefore, it is the policy of the Arkansas Game and Fish Commission, consistent with the common law of the United States, that neither the Commission while acting in its sovereign capacity as trustee of the State's wildlife resources, nor any of its Commissioners or employees, shall be held liable for any claims for personal injury, death, or property damage caused by the actions or habits of wildlife managed for all of the people.

## 01.00-Q Interstate Wildlife Violator Compact

Subject to all applicable statutes and the Constitution of the State of Arkansas, the Arkansas Game and Fish Commission has adopted the Interstate Wildlife Violator Compact (Addendum [T1.01](#)) and the Wildlife Violator Compact Operations Manual (Addendum [U1.01](#)). The Compact is a voluntary interstate agreement which provides participating states with a mechanism to participate in a reciprocal program to:

- A. Promote compliance with the statutes, laws, administrative rules and regulations relating to management of wildlife resources in their respective states; and
- B. Provide for the fair and impartial treatment of wildlife violators operating within the participating states in recognition of the individual's right of due process and the sovereign status of a party state.

The Compact Operations Manual establishes the administrative and procedural guidelines for the Commission's participation in the Compact. In accordance with the Compact and Compact Operations Manual, the Commission may:

- A. Recognize the suspension or revocation of a person's hunting and/or fishing license by another Compact member state and use the Commission's own suspension processes in accordance with Code [01.00-L](#) to impose a suspension of the same scope and duration in Arkansas;
- B. Use its own suspension processes in accordance with Code [01.00-L](#) to suspend the Arkansas hunting and fishing licenses of an Arkansas resident who has failed to comply with the terms of a citation for a wildlife offense issued by another Compact member state (including, without limitation, failure to appear in court or to otherwise resolve the case such as by paying a fine), until such time as the resident presents proof of compliance. Any suspension imposed under this provision may be honored by all other Compact member states; and
- C. Treat an Arkansas resident's conviction for a wildlife offense in another Compact member state as if it had occurred in Arkansas and proceed in accordance with Code [01.00-K](#) including, without limitation, assessing the number of points listed for the most similar Arkansas offense and initiating an administrative license suspension as provided in Code [01.00-L](#).

This code shall not apply to any suspensions or convictions that a person received prior to the effective date of Arkansas joining the Compact on July 1, 2014. To fulfill its obligations under the Compact, the Commission may share information with the other Compact member states including, without limitation, the following: person's name, date of birth, sex, physical description, and last known address, as well as the details of any citations and convictions for wildlife offenses (copy of the citation, citation number, description of the offense, fine assessed, etc.), the scope of any suspension (i.e. fishing, hunting, trapping, or all licenses), and the effective dates of any

suspensions. By purchasing a hunting and/or fishing license from the Commission, all purchasers consent to the Commission sharing such information with Compact member states and others as required by law

## **01.00-R Administrative Hearing Procedure**

- A. Any person whose hunting and fishing rights, privileges, or related licenses have been suspended or revoked by the Commission; who has been denied a Commission-issued license, permit, tag or stamp, or application or rights and privileges attached thereto; or who has received notice of intent to suspend, revoke, or deny the same may request an administrative review hearing only by notifying the Commission in writing within 20 calendar days after receipt of the notice of suspension, revocation, denial, or notice of intent thereof. The request for a hearing must include a valid, current mailing address (or email address) at which the person will receive notice of the date and time of the hearing and any other notices, and the person must notify the Commission of any change of address during pendency of the hearing. The Commission will presume delivery of all notices correctly addressed and mailed to any address that is provided pursuant to a hearing request or, if none is provided, to the address to which the original notice was mailed. Otherwise, the suspension, revocation or denial shall, without further notice, become effective on the 21<sup>st</sup> calendar day after the receipt of the notice described herein.
- B. Upon timely receipt of the hearing request, the Commission shall appoint a hearing officer and notify the person requesting the hearing (at the address provided or, if none was provided, to the address to which the original notice was mailed) of the date, time, location, and nature of the hearing. Hearing requests received after the deadline for receipt shall be denied unless the person requesting the hearing can show good cause in writing for the untimeliness of the hearing request, in which case the Commission shall appoint a hearing officer and notify the person requesting the hearing of the date, time, location, and nature of a hearing for the limited purpose of determining the person's eligibility for an administrative review hearing. If the hearing officer determines that the hearing request was timely or was untimely but for good cause, the requested hearing shall be held immediately thereafter.
- C. All hearings shall be conducted in-person at the Commission's main headquarters unless the hearing officer determines an exception is necessary for compelling reasons demonstrated in writing at the time the request for hearing is submitted. The Commission shall cause a record to be made of the proceedings.
- D. Hearings shall be conducted in an informal manner and without necessity of adherence to the rules of evidence required in judicial proceedings. Both the Commission and the person requesting the hearing shall have the right to be represented by counsel, to submit evidence in open hearing, compel the attendance of witnesses and to cross-examine any witness at the hearing. Irrelevant, immaterial or unduly repetitious evidence shall be excluded by the hearing officer. Notice may be taken of generally recognized technical or scientific facts within the Commission's specialized knowledge, and the

Commission's experience, technical competence and specialized knowledge may be utilized in the evaluation of the evidence.

- E. Except as stated otherwise herein, the hearing officer shall suspend hunting and fishing licenses, rights, and privileges as set forth in Code [01.00-L](#) beginning on the date specified in the hearing officer's final decision.
1. The hearing officer may reduce the suspension term by up to 1/2 if, after consideration of the person's violation record and evidence admitted at the hearing, the hearing officer makes all of the following findings of fact:
    - i. The person's hunting or fishing rights, privileges, or any related licenses have not been suspended or revoked by the Commission or a court of competent jurisdiction within the previous 15 years; and
    - ii. The person's suspension is not based on any Class 5 offense.
  2. Any reduction granted shall be contingent upon the person successfully completing a Commission-approved hunter education course, boating education course, or both, and submitting written proof of the same to the Commission no later than 120 calendar days after suspension. The suspension reduction shall not become effective unless and until the Commission has received proof of completion of the courses.
  3. The hearing officer may modify the suspension to allow the person to retain licenses, rights, and privileges to (a) hunt, if no hunting-related offenses formed the basis of the suspension or (b) fish, if no fishing-related offenses formed the basis of the suspension, provided that the person's hunting and fishing licenses, rights, and privileges have never been suspended or revoked by the Commission or a court of competent jurisdiction for fishing- or hunting-related offenses.
- F. In matters not concerning the suspension or revocation of hunting and fishing rights, privileges, and related licenses, the hearing officer shall affirm, rescind, or modify the suspension or revocation of the license, permit, tag or stamp, or the denial of the application based upon the evidence admitted in the record of the proceedings.
- G. Decisions of the hearing officer shall be final and shall include findings of fact, conclusions of law, and a final decision. The parties shall be served either personally or by mail delivery to the address used to mail the hearing notice (or to any updated address a party provided during the hearing) with a copy of the final decision, which shall become effective immediately upon delivery.
- H. Any aggrieved party may, within 30 days after service of the final decision, file a petition for review in the circuit court of Pulaski County or the county in which they reside if they reside in Arkansas. Unless ordered by a court of competent jurisdiction, the Commission shall not stay implementation of the final decision during the pendency of any appeal of that decision.

Holders of an Arkansas Non-U.S. Resident Temporary Falconry Permit may use any bird for falconry that he/she possesses legally in their country of origin for that purpose, provided that import of that species in the U.S. is not prohibited and provided that he/she has met all permitting requirements in their country of residence.
  - v. Holders of a temporary falconry permit must also have a current Arkansas Non-Resident Annual Small Game Hunting License.
  - vi. A holder of an Arkansas Non-U.S. resident Temporary Falconry Permit may transport registered raptors and must follow federal regulations and possess the necessary federal permits to import or export raptors to and from the United States. Unless the permit holder has the necessary federal permits to bring a raptor into the United States and leave it in the U.S., he/she must take raptors brought into the country for falconry out of the country when he/she leaves.
  - vii. If a raptor brought into the United States and Arkansas dies or is lost in the state, the visitor must report the loss to the Commission's Falconry Coordinator before leaving the state or country.
  - viii. When flown free, any bird brought to this country temporarily must have two functioning radio transmitters attached to the bird which will enable the falconer to locate it.
  - ix. A holder of an Arkansas Non-U.S. resident Falconry Permit must comply with all Commission regulations and the falconry regulation in the states where he/she wishes to

- conduct falconry or through which he/she will travel with the falconry bird.
7. Additional Requirements regarding falconry permits including Reinstatement of lapsed falconry permit and residency requirements.
    - i. If a previously licensed falconer's permit has lapsed for fewer than five years, his/her permit may be reinstated at the level they held previously if they provide the Commission's falconry Coordinator with proof of their certification at that level and their facilities must pass inspection by an AGFC employee.
    - ii. If a previously licensed falconer's permit has lapsed for more than five years, they must pass the Arkansas Falconry written exam by correctly answering 80 percent of the questions and their facilities must pass inspection by an AGFC employee and they must provide written documentation of the class (Apprentice, General, Master) at which they were last permitted or licensed and for which they want their permit issued.
    - iii. If a permitted falconer resides for part of a year in another state, the falconer must contact that state to determine if they need to obtain a falconry permit from that state.
    - iv. If a falconer lives for more than 120 consecutive days in a state, territory of tribal land other than their Arkansas residence, their falconry facilities in that second state must meet Arkansas standards.
  8. Permit Requirements: It is unlawful for holders of Falconry Permits to fail to comply with the following requirements regarding facilities and care.
    - i. Falconry Facility Requirements: Conditions for Facilities maintained on property owned or controlled by the falconer.
      - a. The Commission must be notified in five days of a change of location of a permittee's falconry facilities and a falconer must have new facilities inspected in 30 days of a change of location.
      - b. Birds must be kept in humane and healthful conditions, protected from the environment, predators and domestic animals.
      - c. An indoor facility must have a suitable perch for each raptor, at least one opening for sunlight and must provide a healthy environment.
      - d. Untethered raptors may be housed together if they are compatible with each other.
      - e. Each raptor must have an area large enough to allow it to fly if it is untethered or, if tethered, to fully extend its wings or bate (attempt to fly when tethered) without damaging its feathers or contacting other raptors. It must be large enough to ensure that tethered birds cannot strike the enclosure when flying from the perch.

- f. Each raptor must have a pan of clean water available at all times.
- g. An indoor facility must be large enough to allow easy access for the care and feeding of raptors kept there and must have flooring that allows drainage, does not retain moisture and allows for sanitary maintenance activities.
- h. If raptors housed in an indoor facility are not tethered, all walls that are not solid must be protected on the inside. Suitable materials may include vertical bars spaced narrower than the width of the smallest raptor housed in the enclosure or heavy duty netting.
- i. Acceptable indoor facilities include shelf perch enclosures where raptors are tethered side by side. Other innovative housing systems are acceptable if they provide the enclosed raptors with protection and provide healthy feathers and fresh air.
- j. Falconry raptors may be kept inside the falconer's place of residence if a suitable perch or perches are provided. The residence's windows or other openings do not need to be modified. Raptors kept in a residence must be tethered when they are not being moved into or out of the location in which they are being kept.
- k. All falconers in possession of falconry raptors must have and maintain jesses or the materials and equipment to make jesses appropriate for the size raptor in their possession, leash and swivel, bath container, and scales or balances appropriate for weighing raptors in the falconers' possession (scales for kestrels must weigh in increments of one grams or less).
- l. Falconry raptors may be kept outside in the open if they are under watch, such as by the falconer or a family member at any location or, for example by a designated individual in a weathering yard at falconry meet.
- m. Permittees must keep all facilities and equipment at or above these standards at all times.
- ii. Falconry Facility Requirements: Conditions for facilities maintained on property not owned or controlled by the falconer.
  - a. Regardless of location, a falconer's facilities must meet all the requirements listed for facilities on property owned or controlled by the falconer.
  - b. Falconer must submit a dated statement to the Commission's Falconry Coordinator showing that the falconer or the property owners (if the falconer's facilities are on property not owned or leased by the falconer) agrees that the falconry facilities,

- equipment, and raptors may be inspected without advance notice by Commission personnel at any reasonable time of day.
- iii. **Transportation Facilities: Conditions for care and facilities for transporting raptors.**
    - a. When transporting a raptor, using a raptor for hunting or for temporary housing when away from home a falconer is required to have a suitable perch and protect the raptor from extreme temperatures, wind, and excessive disturbance.
    - b. A “giant hood” or similar container is acceptable for transporting or housing a raptor when away from home.
  - iv. **Temporary Facilities: Conditions for temporary care and facilities for raptors.**
    - a. A falconer may house a raptor in temporary facilities for no more than 120 consecutive calendar days if the bird has a suitable perch and is protected from predators, domestic animals, extreme temperatures, wind, and excessive disturbance.
  - v. **Conditions for Care of Falconry Raptors by Another Falconry Permittee: Another falconry permittee may care for a falconer’s raptor or raptors at the falconer’s facilities or at the other permittee’s facilities for up to 120 consecutive calendar days provided the following conditions are met:**
    - a. The other permittee must have a signed and dated statement from the falconer authorizing the other falconry permittee the temporary possession of the falconry raptor(s). This written statement must include information about the time period for which the other falconry permittee will keep the raptor(s) and state what he or she is allowed to do with the raptor(s). If the other falconry permittee caring for the raptor(s) holds the appropriate level falconry permit, he/she may fly the falconer's raptors in whatever way the falconer authorizes, including hunting.
    - b. The written authorization to the other falconry permittee from the falconer must be accompanied by a copy of FWS form 3-186A that shows the falconer as the authorized possessor of each of the falconry raptor(s).
    - c. The raptor(s) must remain on the falconer’s permit and will not count against the possession limit of the other falconry permittee caring for the raptors.
  - vi. **Conditions for Care of Falconry Raptors by a Person who does not have a falconry permit: A person who does not have a falconry permit may care for a falconer’s raptor(s)**

- at the falconer's facilities for up to 45 consecutive calendar days provided the following conditions are met:
- a. The person(s) caring for the raptors may not fly them for any reason.
  - b. The raptors must remain in the falconer's approved facilities.
  - c. The raptors must remain on the falconer's permit.
- vii. Permit Requirements: It shall be unlawful for holders of Falconry Permits to fail to comply with the following requirements regarding taking and possession of raptors from the wild:
- a. Falconers may take no more than 2 raptors from the wild each 365 consecutive day period beginning on the date the falconer took the first bird to use in falconry.
  - b. If a falconer transfers a bird that he/she took from the wild to another falconer in the same year in which it was captured, the bird will count as one of the raptors the falconer is allowed to take from the wild that year; it will not count as a capture by the recipient, although it will always be considered a wild bird.
  - c. Falconers may not intentionally capture a raptor species that their classification as a falconer does not allow them to possess for falconry. Raptors captured by falconers who are not allowed to possess that species or age group must be immediately released.
  - d. Raptors must be taken only in a humane manner. Any device used to take birds of prey shall be labeled with the name, address and phone number of the falconer, and must be attended to continually by the falconer. No eggs may be taken from raptor nests.
  - e. Falconers must immediately release any bird captured unintentionally.
  - f. Falconers may recapture a lost falconry bird for which he/she has submitted a Form 3-186A at any time the recapture will not count as taking a bird from the wild.
  - g. Falconers may recapture a raptor wearing falconry equipment or a captive-bred raptor at any time--even if that falconer is not allowed to possess that species of raptor. The bird will not count against the falconer's possession limit nor their capture from the wild limit. The falconer must report the recapture of the bird to the Commission's Falconry Coordinator no more than five working days after the recapture and return the recaptured falconry bird to the person who lost it if that person legally possessed it. Disposition of a bird whose legal

possession cannot be determined will be at the discretion of the Commission's Falconry Coordinator.

- h. Peregrine falcons banded with a Federal Bird Banding laboratory band may not be taken from the wild, however other raptors banded with a federal bird banding lab may be taken if the falconer is authorized to take that species.
- i. If a falconer captures a peregrine falcon that has a colored alphanumeric research band on it or a research marking attached to it, it must be immediately released.
- j. Passage peregrine falcons may be taken from September 20 through October 20 by an Arkansas resident falconer or non-resident falconer with a non-resident hunting license who has been issued an Arkansas Passage Peregrine Falcon Permit by the Commission in accordance with requirements stated on that permit.
- k. If a falconer captures a raptor that has a transmitter attached to it, the falconer has up to 30 days to contact the researcher to determine if he/she wishes to replace the transmitter or its batteries. If the researcher wishes to do so or to have the transmitter removed, the researcher or his/her designee can make the change or allow the falconer to do so before the falconer releases the falcon.
- l. If a falconer captures a raptor wearing a seamless metal band, a transmitter, or any other item identifying it as a falconry bird, the falconer must report the capture of the bird to the Commission's falconry Coordinator no more than five working days after the capture. The falconer must return the bird to the person who lost it, however, if that person cannot possess the bird or does not want to possess it, the falconer may keep it. Disposition of a bird who's legal possession cannot be determined will be at the discretion of the Commission's Falconry Coordinator. During the time period when a falconer keeps a bird for return to the person who lost it, the bird will not count toward the falconer's possession limit or his/her limit on take of birds from the wild, as long as the falconer reports the bird to the Commission in 5 working days of capture.
- m. If a falconer captures a raptor with a band other than the Federal Bird Banding Lab aluminum band, research marking or transmitter attached to it, the falconer must report the band numbers and all other relevant information to the Federal Bird Banding Laboratory in five working days. If the bird is wearing a transmitter, the falconer may contact the

researcher to determine if he/she wishes to replace it. The falconer is authorized to possess the bird for up to 30 days until the researcher or his/her designee does so, or until the falconer replaces it himself. Disposition of the bird will be at the discretion of the Commission's Falconry Coordinator. Temporary possession will not count against the falconer's possession limit.

- n. General and/or Master Class falconers may remove nestlings from a nest or aerie in accordance with the following:

  - 2. A falconer present at the capture site, even if another person captures the bird for him/her, is considered the person who removes the bird from the wild and is responsible for filing a Form 3-186A.
  - 3. If the falconer is not at the immediate location where the bird is taken from the wild, the person who removes the bird from the wild must be a General or Master falconer and must report taking of the bird. If that person then transfers the bird to the falconer, both must file a Form 3-186A reporting the transaction no later than five days after the transfer. The bird will count as one of the two raptors the person who took it from the wild is allowed to capture in any year. The bird will not count as a bird the falconer took from the wild. The person who takes the bird from the wild must report the take even if he or she promptly transfers the bird to another falconer.
  - 4. If a falconer has a long-term or permanent physical impairment that prevents him/her from attending the capture of a species for falconry, a general or Master Falconer may capture the bird for the impaired falconer. The impaired falconer must file a Form 3-186A reporting take of a wild bird and the bird counts against the impaired falconer's total take of wild raptors for the year.
- o. Goshawks, Harris hawks, peregrine falcons, and gyrfalcons captured from the wild or acquired from a rehabilitator must be banded with a permanent non-reusable numbered U.S. Fish and Wildlife Service leg band provided to AGFC by the U.S. Fish

and Wildlife; or implanted with an ISO-compliant microchip. Band numbers and or microchip information must be reported to both AGFC's Falconry Coordinator and the U.S. Fish and Wildlife Service when the acquisition of the bird is reported by the falconer no later than 10 days after acquisition.

1. **EXCEPTION:** If a falconer documents that a raptor's health or injury problems are caused by the band, that documentation must be submitted to the Commission's Falconry Coordinator who will issue an exemption to the requirements for that raptor. The falconer must keep a copy of the exemption paperwork on his person when transporting or flying that raptor. If that bird is wild caught goshawk, Harris's hawk, peregrine falcon, or gyrfalcon, the band must be replaced with an ISO-compliant microchip provided to the falconer through the Commission by the U.S. Fish and Wildlife Service.
- p. A raptor captured from the wild may not be banded with a seamless numbered band.
- q. Falconry bands may not be altered, defaced or counterfeited; however removal of the rear tab on a band on a raptor taken from the wild, and smoothing the surface without affecting the integrity of the band or the numbering on it is permissible.
- r. Take of eyas (nestling raptors incapable of flight) birds is allowed between January 1 and August 1 of each year.
- s. Take of passage (raptors fledged from the nest but less than 1 year of age) is allowed from June 15 through March 1.

Acquisition of a bird from a rehabilitator will count as one of the raptors the falconer is permitted to take from the wild. Transfer to the falconer is at the discretion of the permitted rehabilitator. Falconer must report acquisition of the bird using the required reporting procedures.
- x. Permit Requirements: It is unlawful for holders of Falconry Permits to fail to comply with the following requirements regarding record keeping:
  - a. Falconers must keep copies of all database submissions, including electronic and paper submissions, documenting take, transfer, loss, release, rebanding and/or microchipping of each falconry raptor until five years after the falconer has transferred or lost the bird, or the bird dies.

- c. Wild-caught falconry raptors may be transferred to a raptor propagation permit only after the bird has been used in falconry for at least two years or for one year for sharp-shinned hawks, Cooper's hawks, merlins, and American kestrels.
- d. Wild caught raptors that are less than two years of age or for one year for sharp-shinned hawks, Cooper's hawks, merlins, and American kestrels, may be transferred to another permit type if the bird has been injured and a veterinarian or permitted migratory bird rehabilitator has determined that the raptor can no longer be flown for falconry. Falconer must provide a copy of the Form 3-186A documenting the acquisition of the bird by the propagators to the Federal Migratory Bird Permit office that administers the other permit type.
- e. Falconers may transfer captive-bred falconry raptors to another type of permit if the holder of the other permit type is authorized to possess the bird. Falconers must report the transfer on a Form 3-186A within 5 days of the transfer.
- f. A surviving spouse, executor, administrator or other legal representatives of a deceased falconry permittee may transfer any bird held by the permittee to another authorized permittee in 90 days of the falconer's death. After 90 days, the disposition of a bird held under the permit is at the discretion of the Commission's Falconry Coordinator.
- g. Falconers may use raptors held under a falconry permit in raptor propagation if the falconer or the person overseeing the propagation has the necessary permits if the following requirements are met:
  - 1. If the bird will be used for propagation for fewer than 8 months a year, the falconer does not need to transfer the raptor from his permit.

- xiii. Permit Requirements: It is unlawful for holders of Falconry Permits to fail to comply with the following requirements regarding take of prey by Falconry Raptors:
  - a. Falconers may take wildlife only within the specific seasons and bag limits, except that squirrels and rabbits may be taken outside of the specified hunting season by falconry birds with a daily limit of 1 game mammal per raptor per day.

- b. If a falconry bird kills a prey animal that was not the falconer's intended prey, and if that kill was outside of the animal's legal open hunting season, the falconers may allow their falconry raptor to feed on the incidental kill but the falconer may not take the animal into possession.
  - c. Falconers must ensure that their activities do not cause the take of a federal listed threatened or endangered species. "Take" under the federal Endangered Species Act means "to harass, pursue, hunt, shoot, wound, kill, trap, capture, or collect or attempt to engage in any such conduct. "Harass" in this Act means any act that may injure wildlife by disrupting normal behavior including breeding, feeding or sheltering. "Harm" in this Act means an act that actually kills or injure wildlife. Falconers must report the location of the take of any federally listed threatened or endangered species to the state's U.S. Fish and Wildlife Service Ecological Services field office.
  - d. Falconry take of bird species for which a federal depredation order is in place is permitted. Falconers may use their falconry raptors to take any species listed in 50 CFR 21, 50 CFR 23, 50 CFR 44, or 50 CFR 45 at any time in accordance with the conditions of the depredation order, however, the falconer may not be paid for doing so.
- xiv. Permit Requirements: It is unlawful for falconers to fail to comply with the following requirements regarding acquisition, transfer, and release or rebanding of a raptor:

## **I1.00 Aquatic Animal Health Requirements**

## 11.01 Definitions

For purposes of the requirements in this Addendum Chapter, the following definitions shall apply:

**Appropriate Fish Sample**– A number of fish, as described below, must include any fish with lesions or behavioral anomalies.

Facility inspection sample number based on an assumed pathogen prevalence level (APPL). Facility inspections must be conducted at the 2% APPL level.

<b><u>Population Size (Number of fish)</u></b>	<b><u>Number of Fish Required for Sample at 2% APPL</u></b>
50	50
100	75
250	110
500	130
2000	145
>100,000	150

**Facility Inspection:** An inspection of an entire facility that establishes whether or not the facility is free from specific diseases. Critical parts of a facility inspection program are 1) the facility must have biosecurity to prevent the introduction of diseases between inspections, and 2) that any fish introduced onto the facility meet the Commissions inspection requirements, and are free of regulated pathogens. Facility level inspections are the preferred testing method and the model set by international standards (OIE).

**Facility Inspection Requirements:** Fish Farms with over >100,000 fish on the facility must submit 150 fish representing all fish species and culture units present on a farm or facility. The ratio of fish species on the farm or facility should be reflected in the composition of the sample. The sample should not be collected from tanks or raceways used for short-term storage of fish produced in other culture units. Biosecurity must be in place and maintained to prevent a change in health status during the period from sample collection to harvesting and moving of the fish. Sample must be collected during appropriate season by a qualified independent party. Facility inspections must be conducted at least once annually, but twice annually for Viral Hemorrhagic Septicemia Virus (VHSV) positive areas.

**Lot Inspection:** An inspection of a single lot of fish (fish that are of the same age, species, brood stock, facility, and water source). Lot inspections establish only the disease status of a specific group of fish on a particular day. Lot Inspections are valid only for as long as the disease status of the lot is protected by biosecurity measures.

**Lot Inspection Requirements:** – 60 fish per lot of fish of the same age, species, brood stock, facility, and water source; which must not be co-mingled with other fish populations between sample collection and fish shipment. Biosecurity must be in place and maintained to prevent a change in health status during period from sample collection to harvesting and moving of the fish. A sample must be collected during appropriate season by a qualified independent party and testing should be conducted as close as possible to anticipated fish movement. Facilities holding species listed as threatened, endangered, or of greatest conservation concern may utilize a sentinel species from the same genus which are located in the same water source for a minimum of 30 days prior to sample collection.

**Appropriate Season-** The first day of March until the first day of June solstice, and the first day of September until the first day of December solstice.

**Appropriate Testing Methods-** A screening and confirmatory test conducted as described in the inspection section of the most recent edition of the “American Fisheries Society – Fish Health Section Blue Book,” or the most recent edition of the World Organization for Animal Health “Manual of Diagnostic Tests for Aquatic Animals,” or conducted according to the approved protocols in a laboratory listed by the U.S. Department of Agriculture’s Animal and Plant Health Inspection Service which has been approved to test for aquatic animal pathogens, or in a USDA NAHLN laboratory by an official NAHLN protocol.

**Biosecurity Required-**

For facilities relying on Facility Inspections:

New aquatic animals must have a health certification status equivalent to, or greater than, that of current health certification status of the facility, or they must be maintained in a biosecure quarantine that protects the main facility from infectious disease introduction. Disinfected eggs from quarantined animals may be moved out of quarantine and the fry moved onto the main facility. Facilities may only use water sources for which the Commission deems there is no evidence that regulated pathogens are present, or must disinfect the water prior to its introduction onto the facility proper.

For facilities relying on Lot Inspections:

A lot of fish (same age, species, water source, broodstock, and facility) must not be co-mingled with other fish on the facility between sample collection and fish shipments. Between sampling and shipping, the fish must be maintained in water sources for which there is no evidence that regulation pathogens are present, or must disinfect the water prior to its introduction into the quarantine area.

**Certificate of Veterinary Inspection (CVI)-** An official document issued by a federal, state, tribal, or accredited veterinarian certifying that the fish

identified on the document have been inspected and were found to satisfy the regulations pertaining to their intended movement - within the same state, between states, or internationally. Void 30 days after issuance.

## **11.02 Viral Hemorrhagic Septicemia Virus Fish Importation Requirements - Areas Deemed Positive for VHSV**

### Requirements:

- A. A Fish Farm Health Inspection Permit will only be issued to persons holding a valid fish farmer, fish dealer, or independent hauler permit who submit on forms supplied by the Commission satisfactory documentary proof including the following information:
1. Proof an appropriate fish sample has been collected by a qualified independent party during the appropriate season and submitted to a fish health inspection laboratory for analysis; and
  2. Inspection reports from a qualified testing laboratory asserting the sample tested negative for VHSV by appropriate testing methods, and
  3. Written documentation from a qualified independent party asserting the fish are farm-raised, the farm or facility uses a VHSV-free water source, and fish or eggs to be shipped to Arkansas have not been mixed with, or potentially contaminated by, fish or water not meeting standards specified for a Fish Farm Health Inspection Permit. To be eligible for a Fish Farm Health Inspection Permit, a farm or facility must provide written documentation from a qualified independent party verifying the farm or facility has a biosecurity plan sufficient to prevent contamination of permit-eligible fish by ineligible fish or by water not from a VHSV-free source, and the farm or facility follows the biosecurity plan without exception. The fish health inspection report must be no more than 60 days old from the date of reported test results at time of application for Fish Farm Health Inspection Permit from Commission.
- B. The Fish Farm Health Inspection Permit is an annual non-transferrable permit issued in 2 six-month intervals in compliance with Addendum [D1.01](#). The first interval is January 1 - June 30, and the second interval is July 1 - December 31. The second interval of the permit will be issued only after new semi-annual testing results are submitted to the Commission. Annual renewal may be granted based upon submission to the Commission of new documents as described above that include new semi-annual testing results. Failure to conduct a semi-annual inspection will result in a 1-year suspension of the Fish Farm Health Inspection Permit.
- C. **EXCEPTIONS:** A Fish Farm Health Inspection Permit shall not be required for import of live fish from a VHSV-positive state if any of the following three exceptions apply:
1. The species are moving to a state-inspected slaughter facility meeting the following criteria:
    - i. The slaughter facility must discharge wastewater into a municipal sewage system that includes wastewater disinfection; and

- ii. The slaughter facility must either render or compost offal, including carcasses.
- 2. The species are moving to a qualified diagnostic facility for disease testing.
- 3. The species are marine or tropical aquarium trade fish species that meet the following criteria:
  - i. The species are moving directly to a home aquarium; or
  - ii. The species are moving to wholesale or retail distributors of marine and tropical aquarium fish and will be permanently confined in a closed system (aquaria, tanks, or lined pools).

## **11.03 Fish Health Requirements For Importation Outside Of VHSV-Positive Areas**

Nonresident fish farm permit requestors must submit the most recent health certificate for their facility, and the previous three years' worth of health certificates (if applicable) with their first Nonresident Fish Farm application form. An annual renewal application of a nonresident fish farm permit must include all new health certificates issued since the issuance of their last permit. If selling fish obtained from sources outside of the permitted farm, health certificates from those facilities must be submitted for review prior to importation into the state, and a copy of the certificate(s) must accompany shipment to the final destination. A copy of the fish health certificates must accompany shipment with Bill of Lading. Importation of wild caught species is prohibited in accordance with Code [35.13](#).

Resident and Nonresident Fish Dealers/Independent Haulers (including Pond Consultants) are required to purchase approved species from Commission permitted sources (see Code [35.01](#)) with required fish health certificate for stocking purposes within the state. The most recent fish health certificates for sources must be submitted with application/renewal at time of submission. If fish are obtained from a new source, their health certificate must be submitted to AGFC for review prior to the importation of the fish. A copy of fish health certificates must accompany shipment with Bill of Lading and Invoice. Importation of wild caught species is prohibited in accordance with Code [35.13](#).

- A. A Nonresident Fish Farm Permit and Nonresident Fish Dealer Permit will only be issued to persons who submit, on forms supplied by the Commission, satisfactory documentary proof including the following information:
1. That an appropriate fish sample has been collected by a qualified independent party during the appropriate season and was submitted to a qualified fish health inspection laboratory for analysis from the facility and for any outside sources the facility utilizes;
  2. Inspection reports from a qualified testing laboratory asserting the sample tested negative for listed pathogens by appropriate testing methods;
  3. Written documentation from a qualified independent party asserting the fish are farm-raised, the farm or facility uses a VHSV-free water source, and fish or fertilized eggs to be shipped to Arkansas have not been mixed with, or potentially contaminated by, fish or water from known sources of regulated pathogens; and
  4. A completed application for the appropriate permit in compliance with Code [35.01](#) and Addendum Chapter [J1.00](#).
- B. Failure to submit required aquatic animal health documentation in a timely manner will result in a 1-year suspension of eligibility to obtain permit.

- C. **EXCEPTIONS:** Aquatic animal health certificates shall not be required for the importation of live fish or crayfish if:
1. The species are moving to a state-inspected slaughter facility meeting the following criteria:
    - i. The slaughter facility must discharge wastewater into a municipal sewage system that includes wastewater disinfection; and
    - ii. The slaughter facility must either render or compost offal, including carcasses;
  2. The species are moving to a qualified diagnostic facility for disease testing;
  3. Channel catfish (*Ictalurus punctatus*), Blue catfish (*Ictalurus furcatus*), and Hybrid Catfish (*Ictalurus furcatus X Ictalurus punctatus*) imported for commercial “foodfish” production may be imported by permitted Resident fish farmers from permitted Non-resident fish farms located in the state of Mississippi, in the area West of Interstate Highway 55 and North of Interstate Highway 20, without a health certificate, provided such fish remain on the receiving facility premises, except to go directly to a terminal processing facility. Exclusions for these species do not apply for fish destined for recreational or other stocking purposes. Receiving facilities that include these fish as part of their farm level or lot inspection are allowed to offer for sale approved species for stocking purposes;

**VHS Fish Farm Health Inspection Permit:**

It shall be unlawful for any person to import, transport or otherwise receive into the state of Arkansas live fish and/or fertilized eggs from any VHSV-positive state (Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, Wisconsin, and Ontario and Quebec) without first obtaining the appropriate permit (see Code [35.01](#)) in addition to a valid Fish Farm Health Inspection Permit issued by the Arkansas Game and Fish Commission and complying with the provisions of said permit. All persons wishing to ship live fish or fish eggs into Arkansas from VHSV-positive states must first obtain the Fish Farm Health Inspection Permit and a copy of the permit must accompany all shipments into the state, even if the fish are transported by a third party. Furthermore, any person hauling live fish through Arkansas from VHS-positive states are prohibited from discharging water from fish-hauling tanks while within the state. All shipments of live fish or eggs coming into Arkansas must be accompanied by an invoice, bill of lading, and appropriate health certificates in compliance with Code [35.03](#). Additionally, the fish health inspection report must be no more than 60 days old from date of reported test results at time of application for Fish Farm Health Inspection Permit from Commission.

A Fish Farm Health Inspection Permit shall be an annual permit that is issued in 2 six-month intervals (refer to Addendum [D1.01](#)). The first interval will cover the period of January 1 - June 30, and the second interval will cover the period of July 1 - December 31. The second interval of the permit will be issued only after new semi-annual testing results are submitted to the Commission. For additional information, please refer to Addenda [D1.01](#), [I1.01](#), and Code [35.11](#).

**Grass Carp (USFWS-Certified Triploid Only):**

All grass carp sold for stocking purposes must be USFWS-certified triploid. Permitted producers participating in the USFWS-certified triploid grass carp program may transfer certification of triploidy to other holders of valid fish farm, fish dealer, or independent hauler permits that wish to sell USFWS-certified grass carp. All persons selling USFWS-certified triploid grass carp are required to maintain records for a minimum of 3 years containing the purchaser's name, contact information, and number of fish sold. All USFWS-certified triploid grass carp must be maintained in separate tanks, hauling units, and/or culture units from uncertified grass carp.

**Health Certificates:**

See Addendum Chapter [I1.00](#) for fish health requirements for all live fish and/or fertilized eggs being imported into the state of Arkansas. All required documents must be submitted to the Commission and reviewed prior to importation.

**Hybrids:**

It is our intent that production and offer for sale of any hybrid fish species is permissible if both parent species are included on the Approved

## Commercial Aquaculture Species List.

### **Wild Crayfish:**

The harvest and sale of native Arkansas crayfish species that naturally colonize aquaculture ponds and are cultured incidental to production of other aquaculture species is allowed.

### **Wild Turtles:**

Aquaculture facilities possessing a valid Resident Fish Farmer Permit may deplete or relocate aquatic turtles naturally colonizing on the premises and impacting fish production, unless the turtle species is otherwise protected. The harvest and sale of native Arkansas aquatic turtle species that naturally colonize aquaculture ponds and are cultured incidental to production of other aquaculture species is allowed with an Aquatic Turtle Harvest Permit or Aquatic Turtle Farmer/Dealer Permit, unless the species is otherwise protected. See Code Chapter [34.00](#).

### **Aquarium Species:**

It is not the intent of this policy to constrain aquarium trade. Marine and tropical fish commonly distributed in the aquarium trade may be sold without special permit, as long as they are held only in closed aquarium systems (aquaria, tanks, or pools) and are not otherwise prohibited. These species cannot be released in Arkansas.

### **Aquaponics / Hydroponics:**

It is not the intent of this policy to constrain aquaponics/ hydroponic production. If live fish and/or fertilized fish eggs are being possessed, propagated, offered for sale, or conditional species are being utilized, at minimum a fish farm permit is required. Any approved species imported for aquaponics/hydroponics must comply with all requirements set forth in Code Chapter [35.00](#) and Addenda Chapters [I1.00](#), [J1.00](#), and [V1.00](#), including health certificate, invoice, and bill of lading requirements.

### **Conditional Species:**

Conditional species are species that are permitted for specific purposes provided the additional terms set forth by AGFC Fisheries Division and biosecurity measures are met. Individuals possessing or desiring to possess these species are required to apply for a Conditional Species Possession Permit in addition to the appropriate permit under Code [35.01](#). The permit application will detail the location of the facility, biosecurity measures taken to prevent the possibility of escape, and the numbers and species to be held (these numbers are best estimates of broodfish and expected production for upcoming year). Some species may be limited to specific types of permit holders based on a species evaluation. The permitted culture of any conditional aquaculture species shall be conducted in a responsible manner that minimizes the possibility of escape and adheres to any additional requirements set forth by the Commission. Permitted individuals are required to construct a barrier that prevents escape of juvenile and adult life stages. Drainpipes from holding and culture units where these species are held must be screened, with mesh sized adequately to prevent escape,

at all times that water is being released. Double screening is required during water release for units with bighead carp and black carp species. The above-referenced measures and any additional measures listed on the application to eliminate the possibility of escape will be considered as part of the best management practices that the applicant agrees to implement for their facility. The Commission will maintain records of the number and location of these species in the state and will review initial applications and inspect facilities to evaluate the potential for escape. Facilities will be randomly re-inspected once in a three-year period of time to ensure adherence to biosecurity measures. The permittee will be notified a minimum of 5 days in advance of an inspection, and an employee of the facility is requested to accompany AGFC personnel during the inspection. This permit must be renewed annually and is non-transferrable. In the event that a conditional aquatic species is released or escapes from a permitted facility, the permittee shall notify the AGFC Fisheries Division immediately. The permittee shall **not** be responsible for unforeseen occurrences such as floods, lightning, or sabotage. Holders of Conditional Species Possession Permits must verify that buyers of these species in Arkansas also have appropriate permits. Conditional species permit holders are required to submit an annual report, on a form provided by the Commission with the permit renewal request, indicating the number of each conditional species produced (farmers) or sold (dealers) in the state of Arkansas. Failure to comply with the terms of the permit may result in permit denial or revocation.

The species covered by these permits include:

#### **Family Palaemonidae**

*\*Macrobrachium rosenbergii* (Malaysian prawn) – certified disease-free (certification must be posted onsite). This species must meet the same disease certification requirements as members of Family Penaeidae.

#### **Family Penaeidae**

*\*Litopenaeus vannamei* (Pacific White Shrimp) – specific pathogen-free (certification must be posted onsite)

Requirements for culture of marine shrimp species *Litopenaeus vannamei* in Arkansas:

- A. All culture must be in an indoor closed recirculating system- with **NO** discharge. This will provide biosecurity protection against pathogens, predators, and undesirable species from entering or exiting the facility.
  1. Floor drains - If needed, each floor drain must have an appropriate-sized mesh/screen to prevent escape by any sized cultured organism. Triple screening is recommended. Discharge from floor drains must enter into the containment tank that can be chlorinated and dechlorinated prior to release into an approved municipal sewer system whose effluent is treated within the system.

2. Catastrophic failure - In the event of a catastrophic failure the floor drain containment tank must be large enough to accommodate the water volume of at least 1.5 times the volume of the largest individual tank in use within the operation to prevent any escape. The containment tank must be chlorinated and dechlorinated prior to discharge. Any possible escape must be reported immediately to the AGFC Fisheries Division.
- B. All solids are to be placed in sealed containers and are for permitted landfill disposal only.
  - C. Water sources must be municipal or well water source. No connection to above-ground freshwater source will be permitted.
  - D. All live shrimp must be placed in ice water prior to leaving the facility, or processed prior to leaving the facility.
  - E. Facilities permitted for the culture of *L. vannamei* culture will not be approved for simultaneous culture of any other crustacean species.
  - F. All post-larval shrimp, nauplii, or brood imported into Arkansas must be obtained from a **Domestic** US Marine Shrimp Farming Program Specific Pathogen Free (SPF) or Specific Pathogen Resistant (SPR) certified disease free culture facility (No wild caught shrimp permitted: brood, post-larvae, or nauplii). All shrimp imported must be from a SPF or SPR certified facility with at least two consecutive years of disease free certification for all crustacean pathogens listed with the US Marine Shrimp Farming Program and OIE. All testing must be conducted by approved shrimp disease testing facilities. For facilities propagating *L. vannamei* routine disease testing must be conducted. Copies of disease certification must be submitted to AGFC and posted on-site.

### **Permits to Culture Unlisted Species:**

Requests to import, possess, propagate, and culture species not listed in this policy will be scientifically evaluated on a case-by-case basis. The burden of proof will rest with the applicant to provide justification as to the need to import and culture the species, justify why currently approved species listed in this policy will not fill the need, and provide information that the requested species will have no significant ecological impact on native species or the resources of the state. The permitted culture of any

unlisted aquaculture species shall be conducted in a responsible manner that excludes the possibility of escape from holding and culture units and adheres to the terms set forth in the permit issued by AGFC. Permitted individuals are required to construct a barrier that prevents escape of juvenile and adult species from culture facilities, and meets all biosecurity, containment, and health certification requirements set forth by the AGFC Fisheries Division scientific review of the requested species. In the event that unlisted aquatic organisms are released or escape from a permitted facility, the permittee shall notify the AGFC Fisheries Division immediately. Additional screening for aquatic animal health pathogens may be required for unlisted species due to country of origin, water source, or specific pathogens of concern and will be considered on a case by case basis.

**Permit Processing Procedures:**

**Permit Renewal:**

Conditional Species Possession Permits and Unlisted Aquaculture Species Permits will be issued on an annual basis to correspond with expiration dates of Fish Farmer, Fish Dealer, and Independent Hauler Permits. The Arkansas Game and Fish Commission is responsible for providing renewal notices to permit holders six weeks in advance of permit expiration date. Existing permits will remain in effect past listed expiration date if a renewal application is submitted by January 31st of the renewal year and processing is pending with AGFC.

**Permit Review:**

Conditional Species Possession Permits and Unlisted Aquaculture Species Permits are granted at the approval of the AGFC Chief of Fisheries. The AGFC may solicit input as needed in the scientific review of individual species and applications.

**Modification of Lists:**

Any individual may petition the AGFC Chief of Fisheries to add or remove species on the *Approved Commercial Aquaculture Species List* or the *Conditional Aquaculture Species List*. The petition must provide thorough documentation of why a species should or should not be included on a list. Petitions should address the biological threat of the species, including native range, habitats utilized, movement patterns, spawning requirements, reproductive rate, food habits, pathogens of concern, and temperature and water-quality limitations. Documentation of any introductions or escapes outside the species' native range must be included and evaluate the potential impacts to native species through predation, competition, disease transmission, and displacement. Petitions must include copies of all pertinent reference material.

Petitions to add or remove species on the *Approved Commercial Aquaculture Species List* or the *Conditional Aquaculture Species List* will be responded to by the AGFC Chief of Fisheries after thorough scientific review of the species and a consultation with an advisory board representing appropriate AGFC staff.

## **01.00 Alligator Farmer Restrictions**

## **01.01 Alligator Farmer/Dealer General Provisions**

- A. Shipping tickets, invoices, or bills of lading shall be maintained for all alligators purchased or sold to verify they have been obtained from a legal source and not from the wild stock of the state, and complete written records of all changes in alligator stock shall be maintained for a minimum of 5 years from the date of each transaction to verify sources of supply and disposition of alligator stock.
- B. Facilities and records shall be subject to random inspection by Game Wardens of the Commission.
- C. Upon request or inspection by the Commission, an alligator farmer/dealer shall disclose ownership of all alligators and provide documentation of inventory of initial and subsequent numbers of all alligator eggs and alligators. Documentation shall demonstrate the inventory is commensurate with production and survival levels for captive populations in compliance with biological standards adopted by the Commission or the U.S. Fish and Wildlife Service.
- D. Each alligator farmer/dealer shall report annually to the Wildlife Management Division by January 31 on a form supplied by the Commission all activities that have occurred during the previous calendar year (January 1 - December 31), including, but not limited to: the number of live alligators (separated by sizes); the number of eggs collected and hatched; information on the purchase and sale of alligators, hides and parts; and the numbers of alligator deaths. Failure to accurately complete this form may result in the non-renewal or revocation of the Alligator Farmer/Dealer Permit.
- E. The advertisement or representation of caimans or crocodiles as alligators is prohibited.
- F. No alligator farmer/dealer or his or her employees shall receive or transfer any alligator, eggs or hides except in compliance with Commission regulations.
- G. Permits to establish and operate alligator farms are not transferable.

## **01.02 Specifications And Facility Standards For Alligator Farms**

- A. An alligator farm must contain suitable land and habitat to support a population of adult alligators in outside breeding ponds and adequate area for the construction of holding houses for young alligators up to 3 years of age. There must be a reliable source of fresh water and equipment for pumping and changing water. Breeding ponds shall be fenced around the perimeters with woven wire or board fences of sufficient height (minimum 4 feet) and tightness, constructed to prevent the escape or entrance of any size of alligator. Fences shall be buried or otherwise secured at the bottom to prevent entrance or escape. Breeding ponds must have at least 1 area at least 6 feet deep and suitable nesting sites.
- B. Pens or holding facilities shall be constructed to prevent the egress and ingress of alligators. The alligator farmer shall provide rearing tanks of concrete, fiberglass, plastic or metal construction for alligators less than 4 feet. Alligators less than 2 feet shall be housed separately from those 2-4 feet. On-site propagation facilities shall provide ponds, nest sites and space for breeding adults and artificial incubators.
- C. Holding houses containing an adequate number of artificial tanks shall be provided for growing small alligators 6 feet or less. A sufficient number of tanks shall be provided to allow for segregation by age/size/classes, and each tank shall be permanently numbered to facilitate accurate record keeping. There shall be sufficient space in each tank for all alligators to completely submerge under water at one time and enough dry area to run around for basking purposes. A properly constructed tank will consist of 2/3 water for 1/3 dry area. The overall size of the tank shall depend upon the number of alligators held, but as a general standard each alligator should have enough space to submerge without having contact with another alligator. Holding tanks shall be designed to permit periodic cleaning of water and a complete change of water at least every other day.
- D. An alligator farmer shall provide security sufficient to ensure no alligators, eggs, or other parts can be moved in or out of the alligator farm without the farmer's knowledge.
- E. Permitted alligator farms shall be subject to inspection by Commission personnel at any time.
- F. An alligator farmer shall make all alligator eggs produced on the farm available for inspection by August 1 of each nesting year. All alligator eggs shall be in containers having not more than one layer of eggs in at least one incubation facility on each alligator farm. Only viable alligator eggs will be credited to the egg inventory. Eggs laid after August 1 may be collected and added to the egg inventory only if egg development characteristics indicate a laying date after August 1 and nests are verified by Commission personnel prior to being collected.
- G. A controlled environmental chamber complete with an incubator shall be provided for hatching of eggs. The chamber shall also contain a sufficient number of holding tanks to accommodate anticipated

hatchlings and to provide a suitable environment for newborn alligators.

## **01.03 Restrictions On Harvest And Sale Of Alligators**

- A. Alligators at least 23 inches raised on a permitted alligator farm, skins, or products of such captive-reared alligators may be sold only upon written approval from the Commission and in compliance with the restrictions below. An alligator farmer also may use any product from a captive-reared alligator less than 23 inches that dies from natural causes, but only in compliance with the following restrictions:
1. No alligator shall be skinned unless the alligator farmer/dealer first obtains written approval from the Commission. Records must be provided to verify that each alligator to be harvested was hatched and captive-reared on the farm or otherwise obtained from a legal source.
  2. Any alligator killed under authority of this section shall be tagged immediately with a tag furnished by the Commission. The tag shall remain attached to the alligator hide until finally processed by the fabricator. It is unlawful for any alligator farmer, dealer or processor to possess untagged alligator hides.
  3. Identifying tags issued to farms are property of the Commission. Alligator tags will be issued to a permitted alligator farmer upon request at least two weeks before scheduled harvest, subject to verification of available stock by Commission personnel. Unused tags must be returned to the Commission by January 15 the year after the tags expire. Possession of Commission alligator tags by persons other than permitted alligator farmers shall be unlawful. Tags are to be used only on skins and on live alligators (1 tag per alligator) shipped directly to a licensed abattoir.
  4. The meat of any alligator legally harvested may be consumed by the alligator farmer and his immediate family but shall not be sold or transferred except as provided in these regulations.
- B. An alligator farmer/dealer may sell, barter, exchange, give or loan any live alligators of at least 23 inches provided written approval is first obtained from the Commission for each transfer. If sold, bartered, or exchanged in interstate commerce or foreign trade, the legal requirements of the state or country involved in the transaction must also be satisfied.
- C. Any request for written approval to sell, barter, exchange give or loan any live alligators must be made in writing at least 2 weeks before the proposed transaction date, contain the name and address of the proposed buyer, reference the dealer's permit number or other authority for possession and describe each alligator by length, belly size, and sex, if known.
- D. A live alligator under 23 inches may be sold, loaned or donated to an accredited zoological park or to an Arkansas state or federal agency for educational use provided written approval is first obtained from the Commission. The request for approval must be made in writing by both the alligator farmer/dealer and the educator, describe each alligator by length, belly size, and sex, if known, detail where each

alligator will be housed and list the party responsible for the care and housing of each alligator.

- E. The Commission shall not approve the transfer of live alligators or alligator eggs outside of their native range unless the alligator farmer/dealer obtains prior written approval from the U.S. Fish and Wildlife Service.
- F. Alligator meat lawfully acquired through production on a permitted alligator farm may be sold to wholesale food distributors, food and nonfood meat processors, restaurants and canneries, provided that:
  - 1. Any alligator meat sold shall be packaged in cardboard cartons, and each carton shall be sealed with a label clearly stating that it contains alligator meat, the number of pounds of meat enclosed, the name of the seller and buyer, the tag number corresponding to the alligator hide from which the meat was taken, and the date of sale. No more than 5 pounds of meat shall be included per carton and cartons shall be used only one time. Failure to properly mark cartons of alligator meat or possession of alligator meat in cartons improperly marked shall be considered a violation.
  - 2. Alligator farmers/dealers shall maintain detailed written records of all alligator meat sales. These records shall be open to inspection by Commission personnel and shall include for each carton of meat sold the data indicated on the carton label as specified in (F)(1) above.
  - 3. All alligator meat purchased by the type business listed above shall be retained in the original carton until the meat is prepared for consumption or processing. All cartons containing alligator meat labeled in compliance with these regulations shall be shipped only within Arkansas or to those states allowing the sale of alligator meat.
  - 4. Alligator farmers/dealers handling alligator meat for human consumption shall comply with the sanitation requirements of federal, state and local authorities.
- G. Alligator hides and other products, except meat, may be sold in compliance with the following:
  - 1. Alligator farmers/dealers may sell the hides, feet, viscera, or skeletal parts of alligators when all such sales are documented to show the kind and quantity of items sold and the name and address of each buyer who purchases for resale. Any packaged alligator parts must be sealed with a label that clearly states the hide tag number(s) of the alligator(s) from which the parts came, the names and addresses of the buyer and seller, the date of the sale, and the number and kind of parts included.
  - 2. No person shall sell any hide or other product manufactured from a crocodylian species (other than an American alligator) that has been declared to be endangered or threatened by the U.S. Fish and Wildlife Service without prior written approval from the U.S. Fish and Wildlife Service.

issuing agency policy, procedure or regulation, or by the compact manual and (2) if the violator provides adequate proof of identification to the wildlife officer.

(c) Upon conviction or failure of a person to comply with the terms of a wildlife citation, the appropriate official shall report the conviction or failure to comply to the licensing authority of the participating state in which the wildlife citation was issued. The report shall be made in accordance with procedures specified by the issuing state and shall contain information as specified in the compact manual as minimum requirements for effective processing by the home state.

All member states may honor a suspension based on failure to comply. Due process safeguards will be accorded.

(b) Upon receipt of a report of conviction from the licensing authority of the issuing state, the licensing authority of the home state shall enter such conviction in its records and shall treat such conviction as though it occurred in the home state for the purposes of the suspension of license privileges.

(c) The licensing authority of the home state shall maintain a record of actions taken and shall make reports to issuing states as provided in the compact manual.

## **ARTICLE V**

### **Reciprocal Recognition of Suspension**

(b) Each participating state shall communicate suspension information to other participating states in form and content as contained in the compact manual.

## **ARTICLE VI**

## **Applicability of Other Laws**

This compact shall be known as the "Wildlife Violator Compact".

## **U1.00 Wildlife Violator Compact Operations Manual**

# U1.01 Wildlife Violator Compact Operations Manual

## SECTION I

### BACKGROUND

#### I. Historical Information

The concept of a wildlife violator compact was first advanced in the early 1980s by member states in the Western Association of Fish and Wildlife Agencies. Law enforcement administrators and Wildlife Commissioners from several states began discussing the idea of a compact based on the format of the existing Driver's License Compact and Non-Resident Violator Compact, both of these related to motor vehicle operator licensing and enforcement.

In 1985 draft compacts were developed independently in Colorado and Nevada. Subsequently, these drafts were merged and the Wildlife Violator Compact (WVC) was presented for discussion at the 1986 Law Enforcement Technical Committee Workshop of the Western Association.

During the 1989 Legislative session compact legislation was passed into law in Colorado, Nevada and Oregon. These three states formed the nucleus for the development of the operational procedures of the WVC.

#### II. Compact Benefits

##### A. For the consumer

1. Delays, and/or the inconvenience involved with the processing of a violation are comparable for residents and nonresidents of participating states.
2. Personal recognizance is permitted in many cases involving wildlife violations. Certain violations and circumstances still require an immediate appearance or bonding.

##### B. For the agency

1. Wildlife law enforcement officers are able to devote more time to patrol, surveillance and apprehension of violators since they are not burdened with violator processing procedures.
2. The burden on courts and jail facilities is reduced because of the decreased caseload involving immediate appearances, bonding and incarceration.
3. Public relations are improved by not having to subject as many violators to the inconveniences of immediate appearance, bonding, or incarceration.
4. The number of "Failure to Appear" cases is reduced because nonresidents cannot ignore a citation from participating states without facing the suspension of their wildlife license privileges in their home states.
5. Wildlife law violators are put on notice that their activities in one state can affect their privilege to recreate in all participating states.

## **WILDLIFE VIOLATOR COMPACT ARTICLES**

### **SECTION III**

#### **PROCEDURAL MATTERS**

##### **I. The Wildlife Violator Compact**

###### **A. What is it?**

The Wildlife Violator Compact (WVC) assures nonresident violators receiving citations for certain wildlife violations in participating states the same treatment accorded residents who are in violation. Procedures are established in Section IV of this manual which cause a nonresident violator who fails to comply with the terms of a citation issued in a participating state to face the possibility of the suspension of his wildlife license privileges in his home state until the terms of the citation are met. Safeguards are built into the WVC to assure that a non- resident violator is afforded all due process protection.

In addition, the WVC provides for the reciprocal recognition of the suspension of license privileges by participating states, subject to limitations again intended to provide due process protection. The reciprocal recognition of suspensions is intended to address the problems associated with the mobility of many violators.

Finally, the WVC provides that information on convictions in participating states shall be forwarded to the home state of the violator. The home state shall treat such convictions as if they had occurred in that state for the purposes of license suspension actions.

The WVC not only assures equal treatment of residents and nonresidents of participating states, but also enhances the law enforcement services and deterrent value of time spent patrolling by uniformed officers.

###### **B. What it is not.**

The WVC is not a device to secure court appearance if a defendant has previously delivered himself into the court's jurisdiction and trial has been postponed to a later date. It is not a device for collecting unpaid portions of fines allowed to be paid in installments by the courts. It is not a punitive device.

##### **II. Release on Personal Recognizance**

###### **A. Violations covered**

1. Any violation subject to the provisions of a "Penalty Assessment", which allows a violator to comply with a citation by mailing a fine payment to the issuing agency or a court, thereby admitting guilt without a formal appearance.
2. Any violation written as a summons requiring a violator to deal directly

with the court, either in person, by mail or through an attorney. Unless there are other restrictions in this document or in the laws, policies or procedures of the issuing state or the court of jurisdiction.

3. In order for a violation to be subject to these provisions the person to whom the citation is issued must be a resident of a Compact state, other than the issuing state, at the time the citation is issued.

#### B. Types of Violations Not Covered

1. Any violations that mandate a personal appearance.

2. Any petty offense or misdemeanor violation that has a jail term as a mandatory penalty.

3. Any felony violation.

4. Any violation that the issuing officer deems serious enough to arrest a resident violator.

5. Any violation or situation which the laws, policies or procedures of the issuing state dictate shall be handled otherwise.

### III. Compliance With a Citation

#### A. Methods of Compliance

1. Payment by mail where provided for.

2. Responding to the citation in person.

3. Submission of a plea by mail where allowed.

4. Responding through an attorney where allowed.

#### B. Evidence of Compliance (in response to a notice of suspension for noncompliance).

1. Certificate from the court.

2. Copy of the court judgment.

NOTE: personal representations, check stubs, money order receipts, etc. are not acceptable.

3. The violator copy of a Notice of Compliance sent by the issuing state.

## **SECTION IV**

### **COMPACT PROCESS**

The following are the general procedures to be followed by enforcement agencies and courts in States which are participants in the Wildlife Violator Compact (WVC). Specific procedures which are developed to comply with the legal and administrative requirements of the various States shall be acceptable so long as they comply with the intent of this manual.

The following procedures make the assumption that the violation in question meets the general requirements of Paragraph II A. of Section III of this Manual.

#### I. Procedures for the Issuing State

A. The officer issues a citation to the violator on the standard form used in that state.

1. When a nonresident is issued a citation and released on personal recognizance under the provisions of this compact, it is advisable that the signature of the recipient is contained on the citation, regardless of specific requirements on that issue.

2. The citation is returnable to the court at a future date specified on the document, in accordance with the laws, regulations, policies, or procedures of the Agency and/or the Court of jurisdiction

B. If the violator pays the fine or resolves the case with the court, as appropriate, the matter is closed and no further action is taken under the provisions of Paragraphs I and II of this section of the WVC.

C. If the violator does not resolve the case by payment of the fine or with the court, action under the provisions of the WVC will be initiated.

1. The "Notice of Failure to Comply" form will be completed and the original delivered to the violator by certified mail, return receipt requested, or in person. The remaining copies are held in a suspense file pending a response from the violator.

**Any "Notice of Failure to Comply" shall be processed by the issuing state and reported to the home state within six months of issuance of the citation.**

a. Sufficient time will be allowed for the defendant to respond to the Notice of Failure to Comply Form prior to initiating further action under the WVC. This will normally be not less than 14 days and not more than 28 days.

b. If the defendant complies with the terms of the citation within the grace period allowed, no further action is taken under the provisions of this section of the WVC. Final action in a court case is not a prerequisite.

2. If the defendant fails to respond within the time allowed, copy 2 of the Notice of Failure to Comply will be sent to the home state of the defendant. The home state will proceed as outlined in Section II.

#### Procedures for Home State

a. If at any time beyond this point in the WVC process the defendant resolves the case with the court, it is imperative that copies 3 and 4 of the Notice of failure to comply (Defendant's and Home State Acknowledgment of Compliance) be mailed immediately so that any pending or ongoing suspension of license privileges which are the result of the action at hand may be canceled.

b. At any time subsequent to the mailing of the Notice of Failure to Comply that the violator complies with the citation as specified in Section B or Section C.1.b, above, no further actions under this section of the WVC will take place.

#### II. Procedures for the Home State

A. Upon receipt of the "Notice of Failure to Comply" from the issuing state, the licensing authority of the home state of the violator will review the form for the following:

1. Is it legible?

2. Is it complete?

3. Is it timely, within the six month limit of the compact?

4. Is the violation covered under the compact?

5. Are all other aspects of the case proper under applicable state laws, policies, and procedures?

B. If for any reason the case cannot be acted on, it will be returned to the issuing state within 14 days with an explanation of the problem. If all

problems are resolved and the case is returned to the home state it will be reinstated.

C. If the case is accepted, it will be entered into the suspension process of the home state.

D. A Notice of Suspension will be prepared and sent to the violator. If it is a provision of the laws, policies or procedures of the home state, an advance warning letter to the violator is acceptable.

The Notice of Suspension should have a delayed effective date to permit the violator to contact the court in the issuing state and resolve the case. The length of this delay is subject to the laws, policies or procedures of the home state, but should be at least 14 days in length.

The Notice of Suspension must inform the violator of the facts behind the suspension with special emphasis on the procedures to be followed in resolving the matter with the court in the issuing state. Accurate information on the court (name, address, phone number) must be provided in the Notice of Suspension. This will help eliminate inquiries of the home state which are costly, time consuming and nonproductive as the home state can do nothing to resolve the case.

Should the defendant request a hearing on the suspension, it will follow form appropriate to the laws, policies or procedures of the home state.

Such hearings will normally be restricted to challenging the right of the home state to suspend under the provisions of the WVC; to deny receiving the original citation (thus the importance of the violator's signature on the citation); or to claim that the case has been resolved.

The question of guilt or innocence regarding the original charge will not be a subject of hearings held under the provisions of this section.

If needed, assistance can be requested from the issuing state. This is normally limited to obtaining certified documentation.

**NOTE: Suspensions levied for failure to comply with the terms of a citation are enforced in the home state of the violator and honored by all compact states.** These administrative suspensions are not to be confused with suspensions which are the result of convictions of wildlife violations in one or more states which are Participants in the WVC.

F. If the suspension is upheld, the defendant must then proceed to resolve the court case with the suspension remaining in effect.

G. If the suspension is denied for any reason, the case is terminated and the suspension order vacated. In such cases the issuing state will be informed of the reason for denial.

H. Appeals from suspension orders will be handled in accordance with the laws, policies and procedures of the home state.

1. Should a suspension order be overturned on appeal, the issuing state shall be notified.

I. When a violator resolves a case with the court in the issuing state, an acknowledgement of compliance will be issued directly to that person. It is

the responsibility of the violator to present this document to the licensing authority in the home state in order to terminate the suspension. The acknowledgement of compliance may take any form acceptable to the home state and the Court.

1. If the acknowledgement of compliance is presented prior to the effective date of the suspension, the suspension is cleared immediately.

2. If the acknowledgement of compliance is presented after the effective date of the suspension, reinstatement will be handled in accordance with the laws, policies and procedures of the home state.

J. Any reinstatement or restoration fees shall be established and assessed in accordance with the laws, policies and procedures of the home state.

### III. Reciprocal Recognition of Suspensions

A. States participating in the WVC shall recognize the suspension for cause of the license privileges of any person by any other participating state under the following circumstances:

1. The suspension is the result a conviction for one or more of the following violations types or a failure to appear on a wildlife citation:

a) Priority will be placed on the following violation types:

B. Recognition of suspensions which do not meet the criteria of section III.

A. 1 and 2 above will be up to the laws, policies and procedures of that

state.

C. Each state participating in the WVC shall communicate suspension information to other participating states, using the secure Interstate Wildlife Violator Compact database. Participating states will use the guidelines prescribed by the board of compact administrators. The following information will be included but not limited to:

1. Positive identification of the subject of the suspension. Including:
